

Carbon Reduction Plan

Supplier Name: Ennogen Healthcare International Limited

Publication date: 19 OCT 2026

Commitment to achieving net zero

Ennogen is committed to achieving net zero emissions by 2045.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

While Ennogen has previously calculated emissions footprints for the years 2022 and 2023, these calculations did not cover the full set of Scope 3 categories. Therefore, for the sake of comparability in future years, we have set the baseline for our calculations to be 2024.

Baseline year: 2024	
Emissions	Total (tCO2e)
Scope 1	7.22
Scope 2	9.65
Scope 3 (included sources)	4,746.11
3.1 Purchased goods and services	3,915.04
3.2 Capital goods	2.91
3.3 Fuel- and energy-related activities	4.1
3.4 Upstream transportation and distribution	473.03
3.5 Waste generated in operations	0.22
3.6 Business travel	57.57
3.7 Employee commuting	36.29
3.9 Downstream transportation and distribution	61.05
3.12 End-of-life treatment of sold products	195.88
Categories 8, 10,11,13 - 15	Not Relevant
Total Emissions	4,762.99

Current emissions footprint

Reporting Year: 2025	
Emissions	Total (tCO ₂ e)
Scope 1	7.06
Scope 2	10.18
Scope 3 (included sources)	9,073.38
3.1 Purchased goods and services	7,779.93
3.2 Capital goods	9.59
3.3 Fuel- and energy-related activities	4.33
3.4 Upstream transportation and distribution	1,057.28
3.5 Waste generated in operations	0.23
3.6 Business travel	19.30
3.7 Employee commuting	34.92
3.9 Transportation and distribution of sold products	23.8
3.12 End-of-life treatment of sold products	144.02
Categories 8, 10,11,13 - 15	Not Relevant
Total Emissions	9,094.12

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets:

- Reduction of 42% across scope 1, 2, and 3 by 2030, against a 2024 baseline.
- Reduction of 90% by across scope 1, 2, and 3 2045, against a 2024 baseline.

Progress towards these targets can be seen below:

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented:

- The engagement of an external partner to more accurately and robustly measure our carbon footprint
- Energy efficient LED lighting added to our Dartford office, alongside lighting timers in bathrooms and other appropriate spaces.
- Recycling awareness initiatives across offices.
- Cycle-to-work scheme providing incentives for colleagues to cycle in their commute rather than drive.
- Maintaining preference of sea freight over carbon intensive air freight.
- Reducing water wastage on site through water saving devices
- Engage key pharmaceutical suppliers and CMOs on decarbonisation plans and embed carbon criteria into procurement decisions.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Optimise inbound shipment consolidation and explore lower carbon transport options with logistics providers.
- Establish a supplier code of conduct for high emission procurement categories.
- Maintain flexible working arrangements to keep commuting emissions low.
- Investigate the drivers of increased pharmaceutical procurement to identify efficiencies without compromising supply security.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate government emission conversion factors for greenhouse gas company reporting.¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:
